

APTOS

THREAD LIFTING METHODS

WORLDWIDE
THE FIRST
THREAD WITH

Hyaluronic acid

Ha

Thread Composition:

Poly Lactic acid and Policaprolacton with Hyaluronic Acid

Innovation is ready!

Are you?

Limited edition of 8203 packs of Visage Excellence method with HA will be issued on the global market from 2019 to commemorate the number of days since the first Aptos thread launch in 1996.

- Bio compatibility
- Anti-inflammatory action
- Collagen stimulation
- Elastin stimulation
- Prolonged hydration of derma

MAIN RESULTS

P(LA/CL)HA threads have more favorable effect on the skin within 14-60 days period after implantation:

1. Thickness of the capsule is more stable, that fits into the normal course of encapsulation of the material, with less inflammatory reaction. It means that rehabilitation period passes faster.
2. Elastin begins producing intensively at earlier stage that allows observing visible improvements soon after implantation.
3. The earlier activation of collagenesis promotes early recovery, increase in density, strength and elasticity of the aging dermis.
4. Shorter rehabilitation period and faster favorable results!

In Pack

P(LA/CL) thread with barbs USP 2/0, EP 3, 190mm-10pcs
Round tip hollow needle 20Gx150mm, straight-10pcs
Round tip hollow needle 23Gx80mm, straight-1pcs
Lancet point needle 18Gx40mm, straight-1pcs
Removable needle attachment

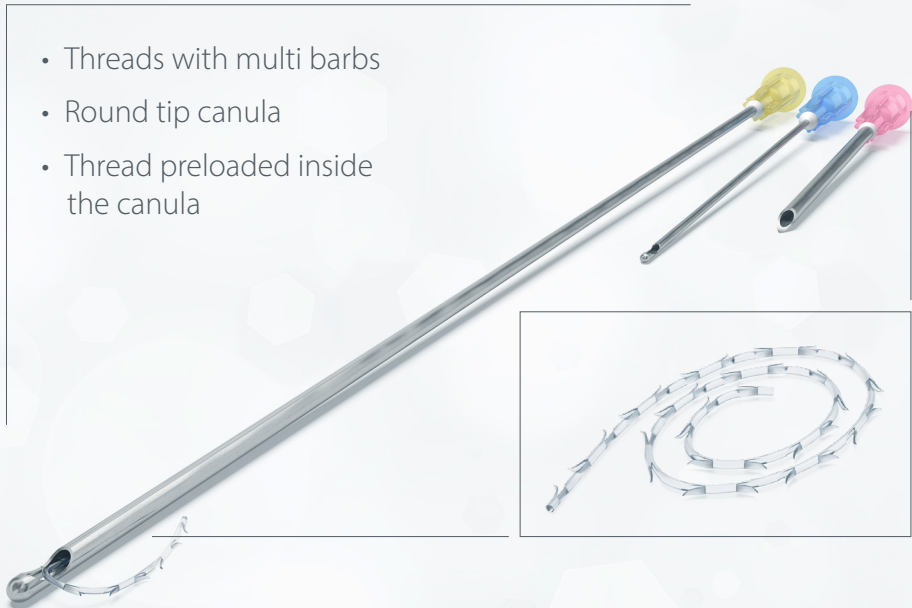

3rd

generation threads with
Hyaluronic acid

Visage

P(LA/CL)HA thread is improved formulation, which ensures additional benefit for the skin. Skin elasticity and texture is visible right after thread implantation.

- Threads with multi barbs
- Round tip canula
- Thread preloaded inside the canula

Revolutionary new formula of thread composition
